

## DOTO

### Fund & Project Management Platform

DOTO is a versatile fund and project management IT platform, creating and maintaining the underlying structure of the interface (web sites, online forms, mobile applications) and the back end (complex real-time database programming) for practical government and corporate solutions. It is a turn-key easy-to-use system which combines high-level accounting with detailed project management reports.

#### Features

- Rapid implementation
- Easy to use – no software development knowledge necessary for modifications
- Intuitive – turns visual workflows into automated software
- Excellent integration capabilities
- Military-grade security
- Meticulous compliance

### Emergency Scenario Applications

Because of the rapid implementation and real-time performance of the software, it is especially suited for emergency applications. DOTO can be deployed in a matter of days or weeks, modifications can be made on the go, and reports can be tailored to fit the organization's ever-changing needs.

### Current Applications of DOTO – web applications, workflow, project planning, customer care

- DOTO manages the national database of emergency supplies in Hungary
- DOTO manages the entire flow of European Union grants in several countries, from grant application through allocation to project realization and reporting
- Government procurement including military
- Government job portal
- Utility companies, critical infrastructure
- Public transport companies
- Government ministries
- Nonprofit organizations, aid organizations
- The Bar Association of Hungarian Lawyers
- The Hungarian Chamber of Agriculture

### DOTO Applications for the COVID-19 Pandemic

- Financial aid management from the application process to delivery & follow up
- Real-time state-wide inventory management of face masks, ventilators, supplies
- Coordination of volunteers
- Platform to handle requests for assistance from the public and organizations, municipalities
- Stay At Home – quarantine monitoring solution to ease the burden on law-enforcement
- QR code application for touchless delivery of supplies, goods, deliveries
